Century Plaza Towers at Century Park → Central Plant On line and Operational.

The 6300 ton Central Plant specifically services only Century Plaza Towers. The state of the art Central Plant with highly energy efficient chillers, boilers and cooling towers allows the Landlord to provide long term operating expense efficiencies to the tenants of the project.

Century Plaza Towers is in a unique position to avoid chilled water (HVAC) outages experienced by other buildings in Century City who are currently on the Century City central plant, which is owned and operated by a third party energy provider. The Central Plant will produce zero PM-10 & PM emissions, zero VOC emissions, ultra low NOx emissions and reduce the net environmental impact of antiquated equipment by 30%.
